Third Quarter 2021 Financial Summary

- Revenue: \$109 thousand, vs. \$131 thousand in Q3 2020
- Operating loss: \$4.4 million vs. \$3.7 million in Q3 2020
- Net loss: \$4.7 million vs. \$3.5 million in Q3 2020
- Cash balance: \$4.7 million at September 30, 2021 vs. \$3.3 million at December 31, 2020

"We are delighted that our PoNS was granted a second FDA Breakthrough Designation, this time for the treatment of dynamic gait and balance deficits resulting from a stroke," said Dane Andreeff, President and Chief Executive Officer of Helius. "This is a significant milestone for us as we prepare for the U.S. commercialization of the PoNS device for MS in early 2022. We are excited about the recent initiation of our company-sponsored Therapeutic Experience Program, an observational clinical study that will be conducted at 10-12 key neurologist and neurorehabilitation centers throughout the country, with enrollment beginning late in the fourth quarter of 2021. This program will provide us with valuable insight about patients' adherence and compliance to a PoNS therapy program."

"As we ramp up for the U.S. commercial launch for MS and advance our studies of the PoNS device in stroke patients, our goal is to unlock the full potential of neuromodulation, bringing our innovative technology to patients as quickly and efficiently as possible and becoming the standard of care for gait deficit in the U.S. and Canada. We also intend to leverage the recently announced TGA authorization of PoNS in Australia for short term use by healthcare professionals as an adjunct to a therapeutic exercise program to improve balance and gait – a very broad scope – to provide capital to support our U.S. commercial launch efforts," concluded Andreeff.
