"The patents listed above are design and utility patents that will help defend against competitive intrusion into our market and I want to thank Proskauer Rose for its expertise and passion in helping us create a robust IP portfolio for the PoNS device," said CEO Phil Deschamps.

About the PoNS™

The PoNS™ device is a non-invasive means for delivering neurostimulation through the tongue. The PoNS™ therapy is currently being studied in the United States and Canada for the treatment of balance disorder for subjects with mild to moderate Traumatic Brain Injury ("mTBI"), and in Canada for the treatment of gait and balance disorder for subjects with MS.

The PoNS™ device is believed to be the first non-invasive means for delivering neurostimulation through the tongue. Researchers believe that use of the tongue as a gateway to the brain may be one of the most natural, non-invasive and direct ways to stimulate the brain. The tongue is anatomically unique, being richly innervated by thousands of nerve fibers and interconnected to the brainstem by two major cranial nerves.

About Helius Medical Technologies (HMT)

Helius Medical Technologies is a medical technology company focused on neurological wellness. HMT seeks to develop, license and acquire unique and non-invasive platform technologies that amplify the brain's ability to heal itself. HMT intends to file for U.S. Food and Drug Administration clearance for the PoNS™ device. For more information, please visit www.heliusmedical.com.
